☎ (416) 628-3625 | ✉ Samadkhan244@hotmail.com | 🔗 linkedin.com/in/samadaku | 🐙 github.com/SamadAKU

## TECHNICAL SKILLS

**Languages:** Java, Python, Dart, C++ , JavaScript, TypeScript, R, HTML/CSS, SQL, Bash/Shell, PHP

**Frameworks & Libraries:** React, OpenCV, Flutter, Figma, NumPy, Pandas, Matplotlib, Seaborn, OpenMP, POSIX, Google API

**Tools & Platforms:** Android Studio, Firebase, Git, Linux, Azure, PostgreSQL, MongoDB, MySQL, CrewAI, PowerShell

**Technical Competencies:** Agile/Scrum, API Development, Mobile Application Development, Machine Learning, DevOps, Data Preparation

## EDUCATION

### Ontario Tech University

Sep. 2022 – Dec. 2027

*Bachelor of Science in Computer Science (Co-op)*

*Oshawa, ON*

- Executive member in **3+ OTSU clubs** including OTU CSClub, OTU ESports, and Tech Management Student Association
- Coursework: Data Structures & Algorithms, Mobile Dev, Web Dev, Software Security, Database Systems, Human Computer Interaction

## EXPERIENCE

### Software Engineer Intern

May 2026 – Current

*Voice Directed Tally Systems*

*Belleville, ON*

- Supported field data collection for the **Forestry and log scaling** industry by building enterprise Android applications using **Android Studio**
- Facilitated over **\$100,000 in revenue** by delivering application updates aligned with client needs and serving as a **technical liaison** to billion dollar clients through revision cycles.
- Improved software quality and stability for a production level platform deployed across **6+ countries** by shipping **100+ commits** alongside senior engineers, contributing to UI design in XML, debugging, and end to end testing throughout the full development lifecycle.

### Software Developer Intern

Dec. 2025 – April 2026

*Accelerated Turn LLC*

*San Francisco, CA*

- Eliminated the need for manual analysts by designing a novel multi agent architecture that automates ETL, analysis, and forecasting
- Cleaned and transformed datasets exceeding **5,000,000+ rows** into SQL databases by engineering a pipeline using **agentic coding**.
- Produced consistent, repeatable statistical reports and visually appealing data charts across multiple automated pipeline runs and varied dataset formats, including **CSV, JSON, XML, and TXT** files, by enforcing **controlled LLM function calls** for analysis and visualization.

## PROJECTS

### Sign Language Learning Mobile Application

March 2026

*Dart, Flutter, Android Studio*

- Enabled progressive sign language skill building by engineering a mobile application delivering interactive lessons through structured plans.
- Covered common phrases, the alphabet, and everyday vocabulary by establishing a **lesson based curriculum** with categorized sign modules.

### Spotify LLM Web Application

December 2025

*Python, HTML, CSS, JavaScript, Node.js, Spotify API*

- Helped users discover relevant music tailored to their taste and listening preferences by building a novel **LLM driven natural language interface** to the **Spotify API**, translating free form prompts into structured, resolvable song metadata.
- Enabled authorized API requests within the automated pipeline by integrating Spotify's **OAuth 2.0** flow to efficiently manage token usage

### Financial Management Mobile Application

July 2025

*Dart, Flutter, Android Studio*

- Enabled families to share expense reports by building a cross platform **Financial Planning** mobile app.
- Provided users with actionable spending insights by designing an **expense analytics dashboard** using data visualization techniques.

## LEADERSHIP EXPERIENCE

### Computer Science Club

October 2025 – Present

*Vice President*

*Oshawa, ON*

- **Hosted HackHive**, a large scale Hackathon with **200+ applicants**, being the first event globally supported by both **Microsoft** and **Kyndryl**, driving widespread industry recognition.
- Managed and coordinated a marketing team boosting viewer engagement by **300%** and reaching **100,000+ views** in one month, significantly increasing visibility for club events and initiatives.
